Interface Symposium on Computing Science and Statistics

May 16-18, 2012
Rice University
Houston, Texas, USA

Organizing Committee Co-Chairs

David W. Scott, *Rice University*
Hadley Wickham, *Rice University*
Jeffrey Morris, *M. D. Anderson*

Conference Themes

Future of Statistical Computing:
Internet Scale Data, Flexible Modeling, and
Visualization

About The Conference

The Interface Foundation of North America cordially invites you to participate in the 43rd Interface Symposium, the premier annual conference on the interface of computing and statistics. The Foundation is a non-profit educational corporation founded in 1987 to sponsor the symposium and publish the proceedings. IFNA also co-publishes the *Journal of Computational and Graphical Statistics*. For further information about IFNA visit our web site at <http://www.interfacesymposia.org>. The 2012 Symposium will be held on the campus of Rice University in Houston, Texas. The theme focuses on computing with large scale data arising from Internet, Simulation Modeling and Visualization. The Keynote will be given by Trevor Hastie of Stanford University, *Matrix completion and large-scale SVD computations*.
